Re: Prevent the violation of human rights

03 February 2021

Dear sir/madam,

Dear companies of the path to justice, fellow painstaking friends of Amnesty International,

The Islamic Republic of Iran has started the new surge of imprisonment of our fellow compatriot Kurdish people inside Iran. According to our valid and comprehensive reports of the Human Rights organizations which are actively monitoring the events inside the borders of Iran, more than 120 people (the detainees list in this [link](#)) are right now in the custody of the security authorities of the Islamic Republic regime without providing any charges or sentences, all while their dignity is being disrupted and their condition is unknown.

Also there are numerous reports regarding the use of the National Emergency Notification System by the Islamic Republic of Iran to send threatening messages to under age youngsters and terrorizing them with "the imminent persecution" notice. The propaganda machine of the Islamic has started to roll their old frightening based strategy on their national television and media to scare the people and suppress their freedom willingness.

Our sheer fear has roots in the fact that we don't have any sort of report or news, addressing our concerns on the health of the 120 imprisoned people, among which elderly and exposed people to viral diseases can be seen. The recent imprisonment reminds us the stories of old, the stories in which our nation suffered fearlessly just because of their ethnicity and free soul.

We believe the running motivation of Islamic Republic regime recent action is to spread panic into the public and liberty seekers, in order to advance their own political agenda, as the 120 individuals who are detained within this new imprisonment surge, are collectively free of any sort of charges. Accordingly, their subject of actions can not be evaluated as "illegal and prohibited", even based on the standards and unethical established laws and regulations of the Islamic Republic Justice and security system.

We, as a Kurdish Human Rights network, respectively ask the Amnesty International to react against the imprisonment surge of the Kurdish nation and help us to spread these repressive measures of Islamic Republic of Iran among the other international Human Rights movements and administrative bases to thwart the threat of a potential tragedy.

Best regards,

Salar Ashnar
